ABOUT US

Founded in 2020, EEC was built with the vision and desire to provide expert guidance and solutions to clients while demonstrating a respect for the natural world and its interconnectedness with human health.

EEC is dedicated to promoting sustainability and protecting the planet by providing expert advice and innovative solutions to individuals and organisations Australia-wide. Our mission is to empower our clients to make informed decisions that minimise their environmental impact and contribute to a more sustainable future. We are committed to delivering high-quality, ethical, and cost-effective services that meet or exceed our clients' expectations.

We strive to be a leading force in creating a healthier, more sustainable world for generations to come.

With over 14 years experience in professional engineering services, we aspire to be a leading provider of innovative environmental solutions that address the complex challenges facing our planet. Through our work, we seek to promote a sustainable future where the natural world and human society can thrive together.

VISION

We envision a world where human progress and environmental protection are in harmony. We aspire to be a leading provider of innovative environmental solutions that address the complex challenges facing our planet. Through our work, we seek to promote a sustainable future where the natural world and human society can thrive together. We are committed to advancing the understanding of environmental issues and fostering a culture of environmental stewardship.

VALUES

At EEC, we are guided by a set of core values that define who we are and how we conduct our business. These values are:

01

Environmental Stewardship: We are committed to protecting and preserving the environment, and to promoting sustainable practices that reduce our impact on the planet

02

Innovation: We are dedicated to finding creative and effective solutions to environmental challenges and to using the latest technologies and scientific knowledge to achieve our goals.

03

Integrity: We believe in honesty, transparency, and ethical behaviour in all aspects of our business. We strive to build trust with our clients, partners, and employees by upholding the highest standards of professionalism and accountability.

04

Collaboration: We recognize that solving complex environmental problems requires the expertise and cooperation of many different stakeholders. We are committed to working in partnership with our clients, communities, and other organisations to achieve our shared goals.

05

Excellence: We are passionate about delivering high-quality work that meets or exceeds our clients' expectations. We strive for excellence in everything we do, from our research and analysis to our communication and customer service.

BUSINESS CAPABILITIES

With sustainable partnership built on trust and respect at the forefront of the business, EEC is dedicated to working in collaboration with Developers, Local Councils, Construction Contractors/Builders and Town Planners on sites of interest, providing all works and reporting requirements on time and within budget

01

Environmental Assessments

Conducting comprehensive assessments to evaluate the potential environmental impacts of proposed activities or projects.

02

Compliance

Staying up-to-date with the complex and ever-changing environmental regulations and policies, and providing guidance to clients on how to remain compliant

03

Risk Assessment

Identifying potential risks and hazards associated with various environmental activities, and developing strategies to mitigate them.

04

Remediation

Providing effective solutions to mitigate or remediate environmental damage caused by activities such as spills or releases of hazardous materials.

05

Environmental Planning

Developing and implementing environmental management plans that align with client goals and objectives while promoting sustainability.

06

Stakeholder Engagement

Engaging with stakeholders, including regulatory agencies, communities, and industry partners, to build consensus and support for environmental initiatives.

07

Data Management

Collecting, analyzing, and managing environmental data to inform decision-making processes for clients.

08

Sustainability

Promoting sustainable practices and identifying opportunities for clients to reduce their environmental footprint while maintaining profitability.

SERVICES PORTFOLIO

- Environmental Services
- Environmental assessments
- Site investigations
- Regulatory compliance
- Sustainability planning
- Natural resource management
- Preliminary site investigations (PSI)
- Human and Ecological Health Risk Assessment

- Detailed site assessments (DSI) •
- Waste classification •
- Leachability testing •
- Offsite soil disposal solutions •
- Asbestos Audits and Occupational Hygiene Services •
- Real time Smart Sensor Monitoring •
- Due Diligence and Feasibility Assessment •
- Air Quality/Hygiene issues •

OUR CLIENTS

OUR TEAM

Jared holds his Bachelor of Science (BS) and Bachelor of Civil and Environmental Engineering (BEng). He chose to undertake this area of study due to concerns about environmental degradation continuing to grow and how he can contribute to helping address these pressing issues.

With a passion for solving complex environmental problems, Jared wanted to help reduce the negative impact of construction on the environment and promote more sustainable practices. It is important to him that he plays a critical role in protecting the environment and ensuring a sustainable future for generations to come.

Jared has been Managing Director at EEC Pty Ltd since April 2020. He has 14 years experience in professional engineering services specialising in contaminated land assessment and remediation projects across Australia. Jared is a Member of the Geelong Chamber of Commerce and has worked across multiple industry sectors including urban infrastructure, transportation, land development, waste management and mining and has strong industry relationships Australia-wide.
